

# John J. Nowak for Mayor of Lackawanna

## Hopefully Someday Candidate for 45<sup>th</sup> President of the United States of America

4/4/2011 6:10 pm Eastern Time

3/19/2011 During my morning walk, I video tape on my phone, the wrecking ball taking down st. Barbara's church tower. After-wards I reached the **On The Mark Signs Store**, in front of city hall. I looked across the street at our city hall, thinking it is so ugly looking. Thought well they needed the space, and added the square two floor build, about 20 feet in the air, on square steel tubing stilts. Realizing it's not as much additional room as I thought, even if were on the ground. Thinking perhaps remove it, to have the old city hall front revealed, and perhaps have some other office space somewhere else. Thinking it still will be lacking, it's best to build all new, and find the necessary space, perhaps buy more adjacent land or another place like st Barbara's old land, but even there seems lacking in space. Thinking we should have a grand design liken to Orchard Park's city hall, or finer.

Notice about 30 feet ahead, a man was speaking to a police officer through the police car window. I said hello, said, we need to tear down the city hall, it's so ugly and build a new one. The gentle men standing, he had suggested to paint it. I said its too ugly. The man standing suggested the old St Barbara's land, I said it's still not enough property, and it's to far down the road, from the main downtown perhaps. Then I said, if they build my National Bethlehem Water Front Park, then it will be find there, being the speculators will come in and begin buying up the land and open shops and businesses along the whole stretch of ridge road, to supply the many people that will come to the Park.

I said, we should have streets of gold, or at least fine pavement, where we don't have pot holes, we keep having to drive over. Previous to this conversation, I been thinking, we need to go back to the original planed design for Lackawanna, that nature intended, a beautiful northern paradise on the water, liken to a new Jerusalem on a hill. Where is our water front access? We have nothing. Buffalo has reach our boundary with their clean up, and restoration. They ask how would I pay for it? I said that's what politicians are for, and if the people really want something, they just have to ask and demand it, they will get it. Thinking we need to get out of the corporation mindset, waiting for a corporation to lead us by the hand, we need to stand up and lead ourselves. I said, the federal government can pay for it (meaning at least defray some of the cost, especially for the new city hall). The gentlemen said a letter was sent to Washington, he may of said even to Obama, and they didn't even get a reply back. They then ask, either "are you running for mayor?" or "you should run for mayor", I can't recall for sure, perhaps each one said something. I said I am, and said, well I'm 99 percent sure I'm running for mayor. Then the gentle men standing said, he also is running for mayor, we shook hands. He said, I am already stealing some of your ideas.

I ask if he knew me, I said, I ran for third ward councilmen in 1993 and for mayor in 1995, and ran with the platform to build a National Bethlehem Waterfront Park on our waterfront. He said, he knew me. The gentlemen whose running for mayor said, see you on the election trail. I said ok, take care. We departed with a hand shake.

As for the no reply from the federal government for a new city hall. I had been thinking previous to the meeting above, if an elected official **voted four times for a bill to force refusal of medical care for a helpless baby** that survives an abortion, dies (a form of the ultimate water torture, being taken from the warm water sanctuary of his or her mother, to die), and this same elected official then forces every American to have to pay for a medical plan, can become President, than anyone can become president, including me. In my humble opinion Obama has it backwards. He should be demanding medical care for a baby surviving an abortion and end the demand that every American must pay for a another gross inefficient boondoggle by the government. Another federal government power grab, among others, that has no competitive competition to keep cost down. Where eventually all these government boondoggles lead ultimately, in a matter of time. Where now our government debt is soon to reach 15,000,000,000,000 , fifteen trillion.

Therefore, besides announcing a write in candidate for mayor of Lackawanna, if I win or loose, I am also announcing I hope someday I may be a candidate for 45<sup>th</sup> President of the United States of America, which of course means, if I become mayor I may have to resign, if elected President. Then perhaps if/when president I can reply back to Lackawanna, with the some federal assistance if needed, to at least help defray some of the cost of a new city hall. Perhaps even for building the National Bethlehem Waterfront Park recognizing the humanity of Jesus. For his many secular principles, to remind generations the legacy of our christian Judea heritage, from our founding fathers, George Washington, Benjamin Franklin, Thomas Jefferson and early citizens, and later by Abraham Lincoln used a direct quote from Jesus of Nazareth in the bible

## **“A house divided against itself will not stand”.**

That guided their paths to form a more perfect government, and eventually end the inhuman cruelty of enslaving a whole race of people. Labeling a race as less of a person, **same as Obama has in his mind and heart labeled a baby in his or her mother, less then a person**. Very sad, he is on the wrong side of history. Obama should know better, being his race, still feels the abomination, the horrible cruelty of slavery. As if someone once having the slave mentality is freed, should know better, instead immediately adopted the slave master mentality treating cruelly another fellow defenseless innocent American, in abortion.

I have a solution called **“Young Couple Marriage Seven Year Law”** to end abortion in America and the world, once and for all, contain in my book **“Jesus Marriage Proclamation”** on my personal web site. I been writing the last 7 years, researching for 27 years, and thinking on the subject since I was 12 years old.

I believe God has prepared me, the nation is calling me to restore our nation to the original Spirit (intent) of our founding fathers words in our Nation's Constitution of the United States of America.

Namely my first goal is to restore the First Amendment to the Constitution,

"Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof"

**My contention for twenty years is the so called field of psychology is nothing more than a state religion.**

In the conscientious - objector case, the Supreme court defined a religious belief as a "sincere and meaningful belief which occupies in the life of its possessor a place parallel to that filled by God of those admittedly qualifying for exemption" The court later expanded the definition to include ethical and moral beliefs that assumed the function of a religion in the registrant's life. - Hans Tirkpak

"among religions in this country which do not teach.... A belief in the existence of God...[are] Buddhism, Ethical Culture, secular Humanism, and others."

See *Torcaso v. Watkins*, 397 U.S. 488, 495, n.11 (1961)

When in the year of 2010, I John Jerome Nowak spoke these words before a active session of court, before a smirking Judge in the city of Lackawanna.

"Psychology claims to be scientific having a high degree of control and objectivity. However, there is no more fundamental requirement in science then that the replicability of findings be established. Since experiments in the physical sciences produce results that are replicable and generalizable, it seemed reasonable to them, the same was true for psychology. Laboratory experiments actually are ineffective because much human behavior is so sensitive to incidental sources of stimulation, that adequate control wouldn't be achieved, even at attempts of exact replication. As for objectivity and full disclosure in psychology, few replication studies are attempted. Replication studies are particularly apt to be rejected for publishing, when they cast doubt on psychology's accepted conclusions. Some journals state that they do not accept replication studies; others implicitly follow a similar policy."

Seymour Epstein, University of Massachusetts- Amherst

If elected president, I John Jerome Nowak shall remove the state/federal support, indirect and direct funding by the trillions, that went unconstitutionally for many decades toward the so called scientific field (in name only) of Psychology. The so called scientific field of psychology began only so recently in time, 1879 in Germany of all places, whose instigation within a generation, turn their citizens away from reading the bible, setting the stage for World War I and World War II where tens of millions of people had died, needlessly. Where through government supported psychology I submit, by teaching merely sex in the government schools, is linked to the slaughter of over a 50,000,000 babies in the USA alone. Where in the not so distant past, these youthful couples, would have been forced officially regarded as marriages (shot gun weddings), giving birth and mothering their children, instead of killing them. Also be removed philosophy from government institutions. To be both place in the private sector only, removed all their government funding, from all government institutions.

They will have only the same rights and privileges as any other form of religion, secular, non-secular, or containing both types of logic, information. That any human behavior group religious or secular religious, or combined, that takes the place of religion in man, will never again be treated as royalty, kings, giving a favored status, such as in the term “expert” in Governmental agencies.

**Where then all human behavior group religious or secular religious, or combined will have a fair, equal, free access, no government funding of individuals (with exception to chaplains, for our soldiers in distant lands) within the government institutions, according to new guidelines.**

I have proposed, **Seven Amendments to the Constitution.**

I will fight for the religious christian/Judea heritage of our country's birth. This heritage, birth, historical record of our nation, has the rights and law to be taught American citizens, especially to the young citizens, to be at least respected and honored, within limits of the law and within the government institutions of our land, as laid down by our founding fathers, their legacy to teach future generations of Americans.

If any party or individual wish to support me in either campaign, I would be very appreciative. I want to thank the police officer and fine gentlemen, for making me finally commit to running.

You can read my person biography, and life time story, my religious back ground, many political writings with many more governmental proposals:

- **National Bethlehem National Park**
- **Young Couple Marriage Seven Year Law**
- **Seven Amendments to the Constitution**

You can read of my many trials and tribulations I have encounter growing up, and am even encountering now, on my personal website <http://www.christjustified.com>.

In my humble opinion I believe I am a natural rock, carved by unmeritorious provisions laid along my path (grace), by God, not by man's institutions, to prepare me for this journey, God willing.

Thank you Sincerely

God Bless

John Jerome Nowak
